

11th International Conference on Global Public Health 2026

"Climate Change, Health Equity, and Sustainability"

23–24 June 2026

De Montfort University, Dubai, UAE

The theme “*Climate Change, Health Equity, and Sustainability*” highlights the urgent need to address the interconnected challenges of environmental change, fair access to healthcare, and sustainable development. Climate change continues to threaten global health, with its effects falling most heavily on vulnerable populations. By integrating sustainability and equity into climate action, this conference aims to promote research, dialogue, and policies that foster resilience and create healthier, fairer societies for future generations.

The 11th International Conference on Global Public Health 2026 (GPH2026) is a premier global forum for health professionals, academics, researchers, policymakers, and NGO leaders. The 11th edition, GPH 2026, focuses on the urgent intersections of climate change, health equity, and sustainable health systems, bringing together experts and practitioners from across the world to share solutions, strategies, and innovations.

This conference will serve as a global platform to discuss how climate change threatens public health, exacerbates inequalities, and challenges sustainable development.

Why Submit Your Paper?

- Gain global recognition for your research.
- Certificate from DE MONTFORT UNIVERSITY, UK
- Connect with leading experts in Global Public Health
- Receive fast abstract review (within 5 working days).
- Opportunity to publish in international journals.
