CALL FOR PAPERS

12th INTERNATIONAL CONFERENCE ON

GLOBAL PUBLIC HEALTH 2027

(GPH2027)

Transforming Global Public Health: Equity, Innovation, Resilience and Sustainable Health for All

26–27 JULY 2027

RADISSON SUITES BANGKOK SUKHUMVIT

BANGKOK, THAILAND

AI • CLIMATE • HEALTH EQUITY • GLOBAL HEALTH SECURITY

A global platform for research, innovation, policy and collaboration in public health.

ABOUT THE CONFERENCE

The 12th International Conference on Global Public Health 2027 will bring together researchers, academics, public-health professionals, healthcare practitioners, policymakers, government representatives, international organizations, NGOs, community leaders and industry experts from around the world.

Held in Bangkok, Thailand, the conference will provide an international platform for sharing research, knowledge, innovations and practical solutions addressing major public-health challenges facing populations worldwide.

Global public health is undergoing profound transformation. Climate change, emerging infectious diseases, pandemics, health inequalities, artificial intelligence, digital transformation, population ageing, migration, mental-health challenges and pressure on health systems are creating new challenges while also providing opportunities for innovation.

Global Public Health 2027 will explore how research, technology, policy, international cooperation and community action can contribute to healthier, more equitable and resilient societies.

FOUR SIGNATURE PRIORITIES

HEALTH EQUITY

Reducing health inequalities and improving access to quality healthcare for all populations.

INNOVATION

Harnessing artificial intelligence, digital technologies, research and innovative models of healthcare.

RESILIENCE

Building communities and health systems capable of responding to pandemics, climate change, disasters and emerging threats.

SUSTAINABILITY

Developing environmentally, socially and economically sustainable approaches to global health.

SPECIAL GPH2027 FOCUS

AI & DIGITAL PUBLIC HEALTH

Artificial intelligence, big data, digital epidemiology and emerging technologies for population health.

CLIMATE & PLANETARY HEALTH

Climate change, environmental degradation, pollution, food and water security, and resilient health systems.

HEALTH EQUITY & HEALTH FOR ALL

Health inequalities, social determinants of health and universal health coverage.

GLOBAL HEALTH SECURITY & RESILIENCE

Pandemic preparedness, emerging diseases, antimicrobial resistance, disasters and health emergencies.

SCIENTIFIC THEMES

01. Global Health, Health Equity & Universal Health Coverage

- Global health inequalities
- Universal health coverage
- Social determinants of health
- Health and human rights
- Poverty and health
- Gender and health
- Vulnerable and marginalized populations
- Healthcare access and health financing

02. Artificial Intelligence, Digital Health & Health Innovation

- AI in public health

- Machine learning and predictive health
- Digital epidemiology
- Big data and population health
- Telemedicine and telehealth
- Wearable technologies
- AI ethics, governance and privacy
  Digital health equity GPH

03. Climate Change, Environmental Health & Planetary Health

- Climate change and health
- Extreme heat
- Air pollution
- Water and sanitation
- Environmental pollution
- Climate-resilient health systems
- Sustainable healthcare
- Planetary health

04. Pandemic Preparedness & Global Health Security

- Pandemic preparedness
- Emerging infectious diseases
- Epidemic surveillance
- Outbreak investigation
- Immunization and vaccines
- Antimicrobial resistance
- Health emergency preparedness
- Early-warning systems

05. One Health

- Human-animal-environment interactions
- Zoonotic diseases
- Antimicrobial resistance
- Food safety
- Environmental health
- Veterinary public health
- One Health surveillance and policy

06. Noncommunicable Diseases & Healthy Ageing

- Cardiovascular disease
- Cancer prevention
- Diabetes
- Obesity and hypertension
- Tobacco and alcohol
- Physical activity

- Healthy ageing
- Prevention and health promotion

07. Mental Health & Community Well-Being

- Global mental health
- Depression and anxiety
- Suicide prevention
- Youth mental health
- Workplace mental health
- Community mental health
- Psychosocial well-being
- Trauma and resilience

08. Maternal, Newborn, Child & Adolescent Health

- Maternal health
- Reproductive health
- Newborn and child health
- Adolescent health
- Sexual and reproductive health
- Childhood nutrition
- Immunization
- Early childhood development

09. Public Health Nutrition & Food Security

- Malnutrition
- Food insecurity
- Obesity and unhealthy diets
- Micronutrient deficiencies
- Food safety
- Nutrition across the life course
- Sustainable food systems
- Climate and food security

10. Primary Healthcare, Health Systems & Health Policy

- Primary healthcare
- Health-system strengthening
- Universal health coverage
- Health workforce
- Health financing
- Health policy
- Healthcare quality and patient safety
- Health governance

11. Migration, Refugee & Humanitarian Health

- Migrant and refugee health
- Climate-related migration
- Population displacement
- Humanitarian emergencies
- Migration-sensitive health systems
- Mental health and displacement
- Maternal and child health

12. Public Health in Asia: Regional Challenges & Global Solutions

- Public health in Southeast Asia
- Asian health systems
- Health inequalities in Asia
- Tropical diseases
- Urbanization and health
- Asian health innovations
- Primary healthcare
- Regional health security

13. Health Promotion, Prevention & Health Literacy

- Health promotion
- Disease prevention
- Behaviour change
- Health literacy
- Community engagement
- Public-health communication
- School and workplace health

14. Disaster Management & Resilient Communities

- Natural disasters
- Floods, droughts and heatwaves
- Emergency preparedness
- Community resilience
- Disaster risk reduction
- Emergency healthcare
- Crisis communication
- Recovery and reconstruction

15. Health Economics & Sustainable Health Systems

- Health economics
- Health financing
- Cost-effectiveness
- Economic evaluation
- Universal health coverage

- Health insurance
- Sustainable healthcare financing
- Health investment

16. Public Health Workforce, Education & Leadership

- Public-health education
- Workforce development
- Future public-health professionals
- Health leadership
- Interdisciplinary education
- Professional development
- Public-health competencies
- Leadership in health emergencies

SPECIAL GPH2027 SESSIONS

CLIMATE • MIGRATION • HEALTH

A special interdisciplinary session exploring the relationship between climate change, population movement and health inequality, including climate-related displacement, migrant health, infectious diseases, mental health, maternal and child health and access to healthcare.

THE FUTURE OF PUBLIC HEALTH WITH ARTIFICIAL INTELLIGENCE

Topics include AI-assisted disease prediction, epidemiological surveillance, generative AI in healthcare, digital epidemiology, big-data analytics, AI ethics, data privacy, bias and health inequality, and the future public-health workforce.

CALL FOR ABSTRACTS

Researchers, academics, healthcare professionals, policymakers and public-health practitioners are invited to submit original research and innovative contributions.

We welcome:

- Original research papers
- Review papers, systematic reviews and meta-analyses
- Case studies and policy research
- Community-based research and epidemiological studies
- Intervention studies and programme evaluations
- Health-system research and innovative practice presentations
- Research-in-progress and doctoral research
- Early-career researcher presentations
- Poster presentations
- Panel and special-session proposals

ABSTRACT SUBMISSION

Abstracts should clearly present the research question, methodology, findings and significance of the work.

Abstract structure: Title • Author(s) • Institution/Organization • Country • Background • Objectives • Methods/Methodology • Results/Findings • Conclusion • Keywords

Recommended length: 250–350 words

PRESENTATION CATEGORIES

- Oral Presentation
- Poster Presentation
- Virtual Presentation
- Special Session
- Panel Discussion
- Young Researcher Presentation

WHO SHOULD PARTICIPATE?

- Public-health researchers and epidemiologists
- Physicians, nurses and allied health professionals
- University academics and researchers
- Government health officials and policymakers
- NGOs and international organizations
- Community-health practitioners
- Health economists and environmental-health specialists
- Digital-health and AI researchers
- Nutritionists and mental-health professionals
- Students, doctoral and early-career researchers
- Public-health consultants and healthcare industry professionals

INTERNATIONAL COLLABORATION

Global Public Health 2027 encourages international, interdisciplinary and cross-sector collaboration. Researchers are particularly encouraged to submit cross-country studies, international collaborative research, comparative public-health studies, Global South perspectives, Asia–Africa collaborations, North–South partnerships and South–South research.

WHY BANGKOK?

BANGKOK — A GATEWAY TO GLOBAL PUBLIC HEALTH IN ASIA

Bangkok provides an ideal setting for an international public-health conference connecting researchers and professionals across Asia and the wider global community. The conference will provide opportunities to explore public-health experiences and innovations emerging from Thailand, Sri Lanka, India, Indonesia, Malaysia, Vietnam, the Philippines, Bangladesh, Nepal, China, Japan, South Korea and the wider international community.

KEYNOTE & PLENARY TOPICS

- The Future of Global Public Health: From Global Goals to Global Action
- Artificial Intelligence and the Transformation of Public Health

- Climate Change: The Defining Public Health Challenge of the 21st Century
- Building Resilient Health Systems for the Next Pandemic
- Health Equity and Universal Health Coverage
- One Health and Global Health Security
- Climate, Migration and Health
- Public Health Innovation in the Global South
- Mental Health and Community Well-Being
- From Evidence to Action: Making Public Health Research Matter

CONFERENCE OBJECTIVES

- Provide a global platform for exchanging public-health research and knowledge.
- Promote international collaboration in public health.
- Address emerging global health challenges.
- Advance health equity and universal health coverage.
- Explore AI and digital technologies in public health.
- Examine the health consequences of climate change.
- Strengthen pandemic preparedness and global health security.
- Promote One Health approaches and community-based solutions.
- Support emerging researchers and future public-health leaders.

IMPORTANT DATES

Milestone	Date
Call for Papers Opens	2026
Abstract Submission Deadline	15 May 2027
Notification of Acceptance	Within 7 working days
Early Registration Deadline	15 December 2026
Final Registration Deadline	20 June 2027
Conference	26–27 July 2027

JOIN GLOBAL PUBLIC HEALTH 2027

Bring your research to an international audience. Share your knowledge. Build global partnerships. Connect research with policy and practice.

12th International Conference on Global Public Health 2027

Transforming Global Public Health: Equity, Innovation, Resilience and Sustainable Health for All

26–27 July 2027 | Radisson Suites Bangkok Sukhumvit | Bangkok, Thailand
